Attorney Docket: 33216 M 027.2

**IN THE SPECIFICATION**

Please amend the specification as follows.

***Page 13, after the second full paragraph, please insert the following paragraph:***

Adjacent inductor sections also overlap one another. Where they overlap can be referred to as a first area. This first area is smaller than a second area defined by the overlap between non-adjacent inductor sections. For example, the (first) area defined by the overlap of adjacent inductor sections 44 in Fig. 4(b) and 41 in Fig. 4(a) (or 46 in Fig. 4(a)) is smaller than the (second) area defined by the overlap or projection of inductor section 48 of Fig. 4(d) on section 44.
